, Faculty Advisor

ACCEPTED:

## ABSTRACT

*Background:* A need for brief but pertinent, comprehensive, and clinically-relevant optometric data exists for optometry students and recent graduates. The purpose of this project is to identify the most useful clinical data and present it in a manner that is easy to use by students and novice clinicians. *Methods:* The clinical reference guidebook is a compilation of key clinical information that I have compiled over the course my optometry graduate program. *Results:* The book is divided into the following sections: Ophthalmic Drugs—Topical and Systemic; Ocular Disease; Binocular and Pediatric Vision; Contact Lenses; Coding, Billing, and Paperwork; and Primary Care and Low Vision. Most of the information within each section is information that is easily quantifiable in table or chart format or is information that is pertinent to clinic but is advanced thus many students may not have fully mastered. *Conclusion:* Several optometry students and recent graduates have trialed the pocket-sized book. They have reported that the information contained within seems to be very clinically relevant. In particular, the section on drugs, especially the systemic medications with ocular manifestations, seems to be used the most and contact lenses is used almost as often. I am hopeful that the book will be of use to other students and that it will continue to evolve into a valuable, essential tool for all optometry students.

## ACKNOWLEDGEMENTS

Thank you to the following teachers whom I have had the privilege to learn from, without their dedication to teaching, the compilation of this book would not have been possible : Dr. John J. Pole, Dr. Robert Carter, Dr. Phillip Walling, Dr. Gregg Potter, and Dr. Kyle Cheatham. Thank you to Dr. Amy Dinardo for sharing her personal clinical reference notes with me early on in my endeavors. Her notes gave me great ideas on how to build Clinic Buddy. Thank you to Miss Danica Tea for checking and verifying selected works in the book. She will undoubtedly make an excellent doctor in the very near future. Thank you to Dr. David M. Bosak for trialing the book in clinical practice and offering invaluable recommendations. A special thank you to Dr. Robert Buckingham for trusting in me and my abilities enough to agree to be my senior project advisor. A final thank you to Dr. Kyle Booher who gave me the idea to build and further promote this book. Without his encouragement, Clinic Buddy might only be another item in my clinic jacket pocket rather than be an indespensible tool for others to utilize, as I hope it might be some day.

The Clinic Buddy is dedicated to my husband, Matthew William Cardwell. This book is a miniscule example of his unwavering support in my professional endeavors which lead me down a career path in optometry. Undoubtedly, without him I would not be where I am today.

## TABLE OF CONTENTS

BACKGROUND .....	1-2
METHODS.....	2-3
RESULTS.....	3-4
CONCLUSION.....	4
AUTHOR'S NOTE TO READERS .....	4-5
APPENDIX.....	6-103
OPHTHALMIC DRUGS—TOPICAL AND SYSTEMIC.....	6-64
Glaucoma Medications.....	6-9

**BACKGROUND:** The knowledge and skills an optometry student must assimilate in a four year time span is vast. Between classroom lectures, home studies, and the application of this knowledge-base in clinic, it is difficult, at best, to effectively assimilate all of this information upon first-time exposure. Many experts believe that in order to truly learn a principle or fact, one must be exposed to the information at least 6 different times before it will "stick". To add to the learning process, the student must develop skills that will allow "book knowledge" to readily be translated into clinical skill and efficiency. In order to meet this objective, students must have reference material close at hand to periodically refer to over and over. Often, these students either rely on each other, their clinical preceptor, or large, sparsely distributed textbooks to get answers to their questions. When I was a second year student, I sometimes found this approach be impractical and inefficient. Because of this, I started to find ways to remedy my problem.

First, I began making notes on a bi-fold clipboard that already contained pre-printed basic ophthalmic information. After a while, much of this information became unnecessary because I had assimilated most of it, but the need to add more information to my permanent data banks arose. I started taking charts and pasting them into a blank pocket-sized book and wrote my own comments and notes in it when I was in clinic. I continued to use the book into my 4<sup>th</sup> year rotations, every now and again adding more information and cutting old information out. The book

became bulky, parts once again became obsolete, and the need to add more advance information became necessary. I also needed a meaningful senior project. I quickly stepped up the pace and developed the first pocket-size book which contained a variety of information, sent it to the director of clinics and persuaded him to let me use this book as my senior project. He agreed and thus Clinic Buddy was born.

**METHODS:** The purpose of the ophthalmic clinical reference guidebook is designed to provide concise, relevant, and easy-to-reference information most used in a clinical setting. Every effort has been made to ensure the information contained within is accurate and sound. In no way is this guidebook a substitute for sound clinical knowledge or judgment. Rather, the book is a tool which provides basic information enabling the student to efficiently take care of patients' needs while still being able to draw upon conceptual knowledge for sound medical decision-making.

The book is divided into the following sections: Ophthalmic Drugs; Ocular Disease; Binocular & Pediatric Vision; Contact Lenses; Coding, Billing, & Paperwork; and Primary Care & Low Vision. Most of the information within each section is information that is easily quantifiable in table or chart format or is information that is pertinent to clinic but is advanced information that many students have not fully mastered.

Other information such as color vision testing and stereo testing was not included because these tests usually have a key within the test

and thus I found to include it would be somewhat redundant to include. Also, I believe that these types of tests can be fairly easily interpreted to some degree of accuracy even without referring to the test's key. Lastly, in an effort to be concise, some material simply needed to be omitted.

Like many books, subsequent editions are often continuously released as the body of knowledge within the book evolves. It is my hope that this clinical reference guidebook will continue to evolve as well. For example, a small copy of this guidebook is currently being developed for students to carry with them in clinic. In addition, is small enough to fit inside a clinic jacket pocket so that it may be readily reviewed at any time. It is my hope to have the six sections color coded on the edges of the sheets and that the sheets be temporarily bound together so that the owner of the book may easily remove sections that s/he finds unnecessary and bulky and retain sections that are still useful to him/her. The student will be able to write on the pages and make notes if s/he wishes and can even add blank pages to each section to allow personal notes to be written within. In essence, the small book becomes a customizable working body of knowledge and tool to facilitate clinical efficiency and learning for its owner.

**RESULTS:** I have trialed this pocket-size clinic book with several optometry students and recent graduates and have received very positive feedback. Specifically, the information contained within seems to be very

clinically relevant. In particular, the section on drugs, especially the systemic medications with ocular manifestations, seems to be used most. The contact lens section is probably used almost as often. I am hopeful that this will be of use to other students and that the book will continue to evolve into a valuable, essential tool for all optometry students.

**CONCLUSION:** A need for brief but pertinent and clinically-based optometric data exists for optometry students and recent graduates. Currently, it appears as though there is only one such published source, which is offered at the Illinois College of Optometry through the S.V.O.S.H. (Student Volunteer to Optometric Services to Humanity) program. This clinic guide contains excellent clinical information, however, it is incomplete, is not organized in an easy to use fashion, and the books are somewhat difficult to find (only after developing this clinical reference guidebook did the existence of SVOSH clinic guide surface). This project attempted to identify the most useful clinical data. Then that data was compilated and organized in a manner that is easy to use by students and novice clinicians. It has been designed in a manner which facilitates quick referencing ability and ease of use.

**AUTHOR'S NOTE TO READERS:** The purpose of the ophthalmic clinical reference guidebook is to provide concise, relevant, and easy-to-reference information that is most used in a clinical setting. **Every effort has been**

**made to ensure the information contained within is accurate and sound. In no way is this guidebook a substitute for sound clinical knowledge or judgment.** Rather, the book is a tool which provides basic information enabling the student to efficiently take care of patients' needs while still being able to draw upon conceptual knowledge for sound medical decision-making.

A “-“ indicates that the category under which it is listed is not a major factor or concern. For example, if a – is listed under contraindications then no major known contraindications for this item were found while researching the item.

## APPENDIX A

### CLINIC BUDDY: OPHTHALMIC CLINICAL REFERENCE GUIDEBOOK

Glaucoma Medications 1,2,3,4

Generic	Trade	MOA	Conc & Sz	Max Dos.	C/I	Caution w/	Cap Color	Misc
levobunolol HCl	Betagan®	↓ Aq. Prod.	0.5% sol 10 & 15 mL	2 gt bid	Heart and lung cond	DM, cerebrovasc. insuff, hepatic impairment, hyperthyroid	B, Y	may potentiate muscle weak. (ptosis, diplopia), sexual dysfxn, ↑ lipids
cartelol HCl	Ocupress®	↓ Aq. Prod.	1% sol 5, 10, 15 mL	1gt bid	Heart and lung cond	DM, hyperthyroid, catecholamine drugs (reserpine), may antagonize epinephrine	W, Y	may potentiate muscle weakness & systemic effects with oral β blockers, sexual dysfxn, affects lipid profile less, affects depression less
timolol maleate	Timoptic®	↓ Aq. Prod.	0.25% & 0.5% sol 5, 10, 15 mL	1 gt bid	Heart and lung cond	syst absorp, DM, hyperthyroid	Y, B	may potentiate muscle weakness, sexual dysfxn, ↑ lipids
timolol maleate	Timoptic-XE® (gel)	↓ Aq. Prod.	0.25% gt 2.5 & 5 mL, 0.5% gt 5 mL	qhs	Heart and lung cond	syst absorp, DM, hyperthyroid	W	may potentiate muscle weakness, sexual dysfxn, ↑ lipids
levobetaxolol	Betaxon®	↓ Aq. Prod.	0.25, 0.50?	1 gt bid	Heart and lung cond	DM, hyperthyroid	W	sexual dysfxn, ↑ lipids
betaxolol HCl	Betoptic-S®	↓ Aq. Prod.	0.25% susp 5, 10, 15 mL	1 gt bid	Heart and lung cond	DM, hyperthyroid	B	may potentiate muscle weak. (ptosis, diplopia), sexual dysfxn, ↑ lipids; d/c before gen. anesthesia, avoid abrupt wdrl; may preserve VFs at higher IOPs than timolol
travoprost	Travatan®	↑ UvS Out.	0.004% sol 2 & 5 mL	1gt qpm	macular edema, oc inflam	preg/br.feed, renal, hepatic impair, aphakia, pseudop with torn post lens cap	B	may cause growth and darkening of eyelashes, ocular adnexal pig, iris darkening

Systemic Medications with Ocular Implications by Trade Name<sup>2,3,4,9</sup>

35

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
abilify®	aripiprazole	antidepressant/antipsychotic	ukn	schizophrenia, bipolar, agitation, depression	azole antifungals, clarithromycin, cyclosporin, dexamethasone, erythromycin,	blurred Va	
accolate®	zafirlukast	lung-leukotriene receptor antag	blocks leukotrienes	chronic asthma attacks	cyclosporin	angioedema,	
accutane®	isotretinoin	acne	acne	acne (severe)	avoid tetracyclines, steroids, topical clindamycin	oc inflam, cls intolerance, impaired dark adaptation, pseudotumor cerebri, vasculitis, photophobia	preg cat X; violent behavior
aciphex®	rabeprazole	GI-proton pump inhibitor	reduce HCl secretion thru Na+/H+ ATPase	prevention of NSAID, GI ulcers, GERD, esophagitis	cyclosporine, blood thinners, ketoconazole	stevens-johnson	
actonel®	risendronate	osteoporosis-bisphosphonate	inhibits osteoclasts	osteoporosis	neomycin, polymixin, ocular steroid,	scleritis, iritis, conjuncivitis, ptosis, yellow color va dist, diplopia, photophob, s-j, blindness, ocular vaccinia	
actos®	pioglitazone	DM-insulin sensitizer, TZD-oral	PPAR receptor binder	T2DM	ACE, antihist, some Abs, beta blockers, steroids, decongestants, diuretics	diabetic macular edema	
acular® or toradol®	ketorolac	NSAID-nonselective	decrease PG and thromboxanes	inflammation, pain, fever, dysmenorrhea	preg, anticoag, coags, c steroids, asthma, cardiovasc dz, topical diclofenac, dehydr, HTN, ACE inhibs	brand d/c in US	brand (toradol) d/c in US, preg cat ukn; acular is ophthalmic ketorolac
adderall® or dexedrine®	amphetamine/dextroamphetamine	CNS stimulant	stims CNS	CNS stim, narcolepsy, obesity, ADHD	glaucoma, hyperthyroidism, topical cocaine	visual disturbances, Has, mydriasis	schedule II

36

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
advil® or motrin®	ibuprofen	NSAID-nonselective	decrease PG and thromboxanes	inflammation, pain (mild mod), fever, dysmenorrhea	preg, anticoag, coags, c steroids, asthma, cardiovasc dz, topical diclofenac, dehydr, HTN, ACE inhibs	bleeds, stevens-johnson,	OTC
aldactone®	spironolactone	diuretic-mineralcorticoid receptor antag	Na <sup>+</sup> and H <sub>2</sub> O excretion	HTN, CHF, edema, hyperaldosterone, hypokalemia,	ACE inhibs, diuretics, cyclosporin,	dry eye, cls intolerance, myopia, jaundice/icterus	
aleve®	naproxen	NSAID-nonselective	decrease PG and thromboxanes	inflam, pain, fever, dysmenorrhea, RA, osteoarth, ank spond	preg, anticoag, coags, c steroids, asthma, cardiovasc dz, topical diclofenac, dehydr, HTN, ACE inhibs	bleeds, nephrotoxicity, hepatotoxicity, stevens-johnson, ecchymosis	preg cat c
allegra®	fexofenadine	antihistamine-2nd gen	blocks histamine	rhinitis, allergies, insomnia, motoion sickness, nausea, vomiting, sedation	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	Has, blurred vision, diplopia, dry eye, cls intolerance, mydriasis, cycloplegia, increase IOP, nystagmus	
altace®	ramapril	vasodilation-ACE inhibitor	vasodi, Na <sup>+</sup> -H <sub>2</sub> O excret	ACE inhibitor for CHF, HTN, MI, nephropathy	ACE inhibitors, HCTZ, beta blockers, COX 2 inhibitors, cyclosporine, diuretics, pain relievers	stevens-johnson syndrome	
altoprev® or mevacor®	lovastatin	chol-statin, HMG CoA r inhib	decreases TC, LDL and raises HDL	hyperchol, cor art dz, post MI	azole antifungals, clarithromycin, cyclosporin, erythromycin,	lupus like syndrome, stevens-johnson	
amaril®	glemepride	DM-sulfonylurea-2nd gen	stim rel of insulin from beta cells	T2DM	beta blockers		PO mode of delivery
ambien®	zolpidem	sedation - hypnotic		insomnia			
amikin®	amikacin	AB-aminoglycoside	protein synthesis inhibitor	Gm - bacterial infxns such as UTIs	antivirals, cyclosporine, myasthenia gravis	neurotoxicity, nephrotoxicity, ototoxicity, superinfection	injection-IM, IV
antivert®	meclizine	antihistamine-1st gen	blocks histamine	rhinitis, allergies, insomnia, motion sick, naus/vom, sedat	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	Has, blur, diplopia, dry eye, cls intol, mydriasis, cyclopeg, increase IOP, nystag	

+6

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
apresoline®	hydralazine	vasodilation-nitric oxide donor	vasodilator	HTN (mod-severe), CHF, hypertensive crisis	topical diclofenac		
aralen®	chloroquine phosphate	autoimmune-antiprotozoal	interferes with synthesis of RNA and DNA	malaria, RA, autoimmune dzs, amoebal infxns	topical anesthetics, AB's and antifungals, cyclosporin, botox, NSAIDs	maculopathy, yellow vortex keratopathy, diplopia, s-j, photophobia, edema	ophthalmic monitoring of dosage
aricept®	donepezil	antipsychotic-anticholase inhib	blocks breakdown of acetylcholine	for tx of dementia, alzheimer's	ophthalmic alpha 2 ags, cholinergics, cholinesterase inhibits, sympathomim		
aristocort® or kenalog®	triamcinolone	corticosteroid	decr hist release	rhinitis, allergies, inflam, pruritis, dermatitis, eczema, insect bites	ocular viruses, increased IOP, cataracts, local infxn, TB, pregnancy, optic neuritis, vaccinations, CAIs, diuretics, topical diclofenac	IOP spikes, PSC, endophthalmitis, RD, hypopyon, exophthalmos, optic disc vasc disorder, pseudotumor cerebri,	
aspirin-various	aspirin (acetylsalicylic acid)	NSAID	COX inhibitor	pain, fever, antiinflam, MI TIA prev, TIA, arthritis, rheumatic fever	cardio, bleeds, child fevers or viral, stomach, nephro and hepatotoxicity, vaccines, CAIs, ACE inhibs, COX 2, diuretics, omega 3	bleeds, ecchymosis, anaphylaxis	preg cat d
atarax®	hydroxyzine	antihistamine-1st gen	blocks histamine	rhinitis, allergies, insomnia, motion sick, naus/vom, sedat	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	Has, blur, diplopia, dry eye, cls intol, mydriasis, cyclopleg, increase IOP, nystag	
ativan®	lorazepam	sedation-benzodiazepine	binds to benzodiazepine receptors	anxiety, etoh wdrl, muscle spasm, seizures, panic attacks, insomnia, sedation	myasthenia gravis, narrow angle glaucoma, open angle glaucoma	icterus (jaundice of sclera), diplopia, blurred vision, HA's, dry eye, cls intolerance, mydriasis, cycloplegia, increase IOP, diplopia	
atrovent®	ipratropium	lung-muscarinic antagonist	bronchodi, decr mucous secr	asthma, COPD, bronchospasm	atropine, anticholinergics, cholinergics		

38

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
augmentin®	amoxicillin-clavulanate	AB-PCN	CWS inhibitor	bacterial infections	liver, kidney dysfxn, HIV, seizure, PKU, mono, elderly, oral contras, warfarin, PPIs	stevens-johnson, angioedema, stevens-johnson	PCN/Ceph allergies Rx bactrim or macrolies, preg cat b
avandia®	rosiglitazone	DM-insulin sensitizer, TZD--oral	PPAR receptor binder	T2DM	ACE, antihist, some Abs, beta blockers, steroids, decongestants, diuretics	diabetic macular edema, stevens-johnson	
bactrim®	trimethoprim-sulfamethoxazole	AB-combo	folic acid antag	UTI	near term pregnancy, topical anesthetics, warfarin, ACE inhibs, oral contras	stevens-johnson, SLE,	
beconase®	beclomethasone	corticosteroid-nasal	decr hist release	rhinitis, allergies, inflam, pruritis, dermatitis, eczema, insect bites	glaucoma, cats	vision problems	nasal mode of delivery
benadryl®	diphenhydramine	antihistamine-1st gen	blocks histamine	rhinitis, allergies, insomnia, motion sick, nauv/vom, sedat	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	Has, blur, diplopia, dry eye, cls intol, mydriasis, cyclopeg, increase IOP, nystag	
biaxin®	clarithromycin	AB-macrolide	protein synthesis inhibitor	chlamydia	phenothiazines, cisapride, pimozide, heart arrhythmias	stevens-johnsons	preg cat B
botox®	botulinum toxin	muscle-acetylcholine release blocker	decreases ACH at NMJ	paresis for strabismus, blepharospasm, cervical dystonia, cosmetic wrinkles	myasthenia gravis, ptosis, motor neuropathy.	ocular vertical deviation, DE, ptosis, visual disturb, cls intol	preg cat C--caution
BuSpar®	buspirone	antianxiety	binds to serotonin and dopamine receptors	anxiety	azole antifungals	dry eye, cls intolerance, mydriasis, cycloplegia, increase IOP, diplopia	
calan® or isoptin®	verapamil	vasodilation-ca2+ chan antag	vasodi, Na2+, H2o excret	angina, HTN, arrhythmias	ophthalmic alpha 2 ags and beta blockers	icterus (jaundice of sclera)	

29

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP-S/E	MISC
capoten®	captopril	vasodilation-ACE inhibitor	vasodi, Na2+ H2o excret	ACE inhibitor for CHF, HTN, MI, nephropathy	ACE inhibitors, HCTZ, beta blockers, COX 2 inhibitors, cyclosporine, diuretics, pain relievers	stevens-johnson syndrome	
carafate®	sucralfate	GI-gastric mucosa protectant	coats ulcer	ulcers, esophagitis	quinolones		
cardizem®	diltiazem	vasodilation-ca2+ chan antag	vasodi, Na2+ H2o excret	angina, HTN, arrhythmias	ophthalmic alpha 2 ags and beta blockers	icterus (jaundice of sclera)	
cardura®	doxazosin	BPH-alpha 1 ag	reduces cxn of prostate and urethra	BPH, HTN,	cataract surgery, sympathomimetics	collagen fibers leading to floppy iris syndrome, progressive miosis	
catapres®	clonidine	vasodilator-alpha 2 ag	decrease NE release	HTN, autism, ADHD,	beta blockers (including ophthalmic)	dry eye	preg cat c
cefzil®	cefpodoxime	AB-cephalosporin, 2nd gen	CWS inhibitor	Gm - > Gm + for gonorrhea, lyme's dz, pharyngitis, tonsillitis	oral contraceptives, kidney or liver	stevens-johnson syndrome, anaphylaxis, renal impairment	preg cat b; PCN/Ceph/Cef all-- Rx bactrim or macrolides
celebrex®	celecoxib	NSAID-selective COX 2 inhib	decrease PG and thromboxanes	inflam, pain, fever, dysmenorrhea, RA, osteoarth, ank spond	pregnancy, anticoagulants, coagulants, corticosteroids, asthma, cardiovascular dz, blood thinners, smoker, dehydration	bleeds, nephrotoxicity, hepatotoxicity	preg cat c
celexa®	citalopram	antidepressant-SSRI	selectively inhibits serotonin reuptake	depression	diuretics	dry eye,cls intolerance, cycloplegia, increase IOP, diplopia	
chlormycetin® or chloroptic® ol	chloramphenic	AB-other	bacteriostatic, 50S inhib protein synth	AB via IV for meningitis, rickettsial	pregnancy, infancy, kidney or liver dysfunction, hematological or bone marrow disorders, ranoloxine use	blood dyscrasias, optic neuritis, retrobulbar optic neuritis, optic atrophy	preg cat c; injection-IV

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP-S/E	MISC
chloroptic® or chlormycetin® ol	chloramphenic	AB-other	bacteriostatic, 50S inhib protein synth	AB via IV for meningitis, rickettsial	pregnancy, infancy, kidney or liver dysfunction, hematological or bone marrow disorders, ranoloxine use	blood dyscrasias, optic neuritis, retrobulbar optic neuritis, optic atrophy	preg cat c; injection-IV
chlor-trimeton®	chlorpheniramine	antihistamine-1st gen	blocks histamine	rhinitis, allergies, insomnia, motion sick, nau/vom, sedat	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	Has, blur, diplopia, dry eye, cls intol, mydriasis, cyclopeg, increase IOP, nystag	
cialis®	tadalafil	ED-cGMP type V phosphodiester ase inhibitor	smooth muscle dilation of penis	erectile dysfunction	RP, LOW c/d ratio, deg ret disord, NAAION, ACE inhibs, o. b blockers, diuretics, erythromycin, itraconazole	photophob, NAION, bl-gr color, blur, blue sclera, mydriasis, RD incrIOP, sudden Va loss, stevens-johnson	
ciloxan® or cipro®	ciprofloxacin	AB-fluoroquinolone, 2nd gen	blocks bacterial DNA gyrase	bactericidal corneal ulcers, bacterial conjunctivitis, UTIs	Have cls pts wait 15 minutes after instilling gtt as crystals may develop on cls.	eyelid itching, crystaluria	preg cat c
cipro® or ciloxan®	ciprofloxacin	AB-fluoroquinolone, 2nd gen	blocks bacterial DNA gyrase	bactericidal corneal ulcers, bacterial conjunctivitis, UTIs	Have cls pts wait 15 minutes after instilling gtt as crystals may develop on cls.	eyelid itching, crystaluria	preg cat c
clarinex®	desloratadine	antihistamine-2nd gen	blocks histamine	rhinitis, allergies, insomnia, motoion sickness, nausea, vomiting, sedation	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	Has, blurred vision, diplopia, dry eye, cls intolerance, mydriasis, cycloplegia, increase IOP, nystagmus	
claritin®	loratadine	antihistamine-2nd gen	blocks histamine	rhinitis, allergies, insomnia, motoion sickness, nausea, vomiting, sedation	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	Has, blurred vision, diplopia, dry eye, cls intolerance, mydriasis, cycloplegia, increase IOP, nystagmus	
cleocin®	clindamycin	AB-other	50S, inhib protein synth	vaginosis, endocarditis, babesiosis, PID	Caution with botox	stevens-johnson syndrome, jaudice.	preg cat b; injection-IV or IM

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
clinoril®	sulindac	NSAID-nonselective	decrease PG and thromboxanes	inflam, pain, fever, dysmenorrhea, RA, osteoarth, ank spond	preg, anticoag, coags, c steroids, asthma, cardiovasc dz, topical diclofenac, dehydr, HTN, ACE inhibs	bleeds, nephrotoxicity, hepatotoxicity, stevens-johnson, ecchymosis, visual changes	preg cat b
cocaine	cocaine	anesthesia-indirect sympathomimetic	topical anesthesia, epistaxis	topical anesthesia, o. alpha 2 ags and beta blockers, sympathomimetics	cholinesterase deficiency	mydriasis, corneal melt with improper use, vasoconstriction	schedule II
codeine®	codeine	analgesic-narcotic: mild to moderate	binds to opioid receptors	pain reliever-mild to moderate, cough, diarrhea	lung, kidney and liver issues, seizures, sulfite sens, local anesthetics, addison's, ophthalmic beta blockers	pinpoint pupils with overdose	preg cat c; schedule II
cordarone®	amiodarone	antiarrhythmic	prolongs action potential	arrhythmia, cardiomyopathy,	CI quinolones; Avoid certain AB's and antifungals, claritin, diuretics, beta blockers	neuritis, mimics NAION, pseudotumor cerebri, corneal or lenticular deposits, visual disturbances	PCP adjusting dosage w/deposits? Last line agent due to serious s/e's.
coreg®	carvedilol	vasodilator-alpha 1, beta 1 antag	vasodi, decr HR, incr force of ctxn	HTN, CHF	myasthenia gravis, ophthalmic alpha 2 ags and beta blockers,	dry eye, cls intolerance, stevens-johnson, abnormal vision,	
coumadin®	warfarin	anticoagulant	decrease synthesis of vita k clotting factors	clotting disorders-stroke, MI, deep venous thrombosis	recent surgery or trauma, vasculitis, azole antifungals, NSAIDS, some Abs, COX 2 inhibs, PCNs, topical diclofenac,	hemorrhages, vasculitis, ecchymosis,	preg cat x
cozar®	losartan	vasodilator-angiotensin II receptor blocker	vasodil, Na <sup>+</sup> and H <sub>2</sub> O excr	HTN, CHF, MI, diabetic nephropathy, stroke prophylaxis	pregnancy, ACE inhibitors, diuretics, beta blockers, COX 2	angioedema	preg cat c/d
crestor®	rosuvastatin	chol-statin, HMG CoA r inhib	decreases TC, LDL and raises HDL	hyper chol, tri, and lip, atherosclerosis	dehydration, cyclosporin, azole antifungals, blood thinners	stevens-johnson, jaundice/icterus,	
cymbalta®	duloxetine	antidepressant	inhibs norepi and serotonin reuptake	depression, diabetic neuropathy, anxiety, fibromyalgia	narrow angle, cipro, o. beta blockers, o. diclofenac, NSAIDs, omega 3, diuretics	glaucoma, s-j, blur	

42

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
cytotec®	misoprostol	GI-prostaglandin E1	inhibits gastric acid secr, produces uterine ctsns	prevention of NSAID GI ulcer, constipation, pregnancy termination	diuretics		
cytovene®	ganciclovir	antiviral-DNA synthesis inhibitor	defective nucleotide incorporated into viral DNA	herpes, CMV	hematotoxicity, carcinogenic, aspermatogenesis, cyclosporin	retinal detachment	
daraprim®	pyrmethamine	antiprotozoal	interferes with synth RNA and DNA	malaria, toxoplasmosis, isosporiasis	kidney and liver dz	stevens-johnson	
darvocet-N-100®	propoxyphene-N/APAP	analgesic-narcotic: acetaminophen + opioid	combo, see MOA for individual drugs	pain reliever-mild to mod, fever	lung, kidney and liver issues, seizures, sulfite sens, local anesthetics, addison's, ophthalmic beta blockers	mydriasis, jaundice/icterus, pinpoint pupils with overdose	preg cat c, schedule IV, taper with dependency,
darvon®	propoxyphene	analgesic-opioid	narcotic	pain-mild to moderate	suicidal pts, drug abuse, impaired liver and renal fxn, phenothiazines	visual disturbances	schedule IV
decadron®	dexametasone	corticosteroid	decr hist release	rhinitis, allergies, inflam, pruritis, dermatitis, eczema, insect bites	ocular HSV, increased IOP, cataracts, glaucoma, local infxn, TB	IOP spikes, cataracts (PSC)	
deltasone®	prednisone	corticosteroid	decr hist release	rhinitis, allergies, inflam, pruritis, dermatitis, eczema, insect bites	ocular HSV, increased IOP, cataracts, glaucoma, local infxn, TB	IOP spikes, cataracts (PSC)	
demerol®	meperidine	analgesic-opioid	narcotic	pain-moderate to severe for preoperative sedation, obstetric analgesia,	lung, kidney and liver issues, seizures, sulfite sens, local anesthetics, addison's, ophthalmic beta blockers	visual disturbances	involuntary movements

F3

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
depakote®	divalproex	antiepileptic	ukn	epilepsy, bipolar, migraines,	some NSAIDS	dry eye, cls intol, cycloplegia, stevens-johnson, diplop, nystag, jaundice/icterus	
desyrel®	trazodone	antidepressant-atypical	inhibits serotonin reuptake	depression, insomnia	azole antifungals, some NSAIDS,	dry eye, cls intolerance, cycloplegia, increase IOP, diplopia	
detrol®	tolterodine	incontinence-muscarinic antagonist	relaxes detrusor muscle in bladder	urinary incontinence	AACG, o. cholinergics, o. anticholinergics, o. sympathomimetics,	dry eye, cls intolerance, mydriasis, cycloplegia, o. phenylephrine	
dexedrine® or adderall®	amphetamine/dextroamphetamine	CNS stimulant	ukn	CNS stim, narcolepsy, obesity, ADHD	glaucoma, hyperthyroidism, topical cocaine	visual disturbances, Has, mydriasis	schedule II
diabeta® or micronase®	glyburide	DM-sulfonylurea-2nd gen	stimulates release of insulin from beta cells	T2DM	ACE inhibi, antihist/decon, B block, diuretics, cipro, sympathomims, AB's, steroids	blurred vision	PO mode of delivery
diabinese®	chlorpropamide	DM-sulfonylurea-1st gen--discontinued	stimulates release of insulin from beta cells	T2DM	ACE inhibitors, HCTZ, antihistamines, beta blockers, diuretics, some antiinfectives, sympathomimetics		brand (diabinese) discontinued in US, see generic
Diamox®	acetazolamide	diuretic-CAI	NaHCO3 excretion	oral diuretic for edema, aacg	use this oral diruetic with diabetic pts to tx aacg	dry eye, cls intolerance, myopia	
diflucan®	fluconazole	antifungal-azole	disrupts fungal membrane	fungal infxns, meningitis, tinea	kidney and liver dz	stevens-johnson, jaundice/icterus	
dilantin®	phenytoin	antiepileptic	modulates sodium and calcium channels	epilepsy	topical anesthetics, some antivirals and Abs, steroids	DE, cls intol, cycloplegia, nystag, yellow-blue color va disturb, diplopia, ophthalmoplegia, s-j	
dimetane®	brompheniramine	antihistamine-1st gen	blocks histamine	rhinitis, allergies, insomnia, motion sick, naus/vom, sedat	AACG, increased IOP, hyperthyroid, ophthalmic anticholinergics, cholinergics, and sympathomimetics	cls intol, mydriasis, cyclopeg, increase IOP, nystag	

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
diovan®	valsartan	vasodilator-angiotensin II receptor blocker	vasodil, Na2+ and H2O excr	HTN, CHF, MI	pregnancy, ACE inhibitors, diuretics, beta blockers, COX 2	angioedema	preg cat c/d
diuril®	chlorothiazide	diuretic-thiazide	Na2+ and H2O excretion	diuretic used to tx edema, HTN, CHF	ACE inhibitors, beta blockers, systemic CAIs, diuretics, topical diclofenac, pain relievers, omega 3	stevens-johnson, HA's, blurred Va, dry eye, cls intolerance, myopia	patients allergic to this drug may be allergic to sulfa drugs and CAIs
dyazide® and maxzide®	triamterene w/HCTZ	diuretic combo- Na2+ block + thiazide	Na2+ and H2O excretion	HTN, CHF, edema	ACE inhibs, cyclosporin, diuretics, topical diclofenac,	dry eye, cls intolerance, myopia	
dynapen®	dicloxacillin	AB-PCN	CWS inhibitor	skin infections, osteomyelitis,	HIV/CMV, warfarin, oral contras, PPIs	seizures	PCN/Ceph allergies Rx bactrim or macrolies, preg cat b
elavil®	amitriptyline	antidepressant-TCA	ukn/inhibits norepi, serotonin reup	depression	systemic CAI's, diabetics, glaucoma Tx, hyperthyroid	dry eye, cls intolerance, cycloplegia, increase IOP, diplopia	
enablex®	darifenacin	antispasmodics-- overactive bladder	antagonizes ACH	overactive bladder	narrow angle, myasthenia gravis, anticholinergic use, o. anticholinergics, o. sympathomimetics, erythromycin	blur, dry eye	
enbrel®	etanercept	autoimmune	reduces inflamm	RA, ank. Spond, psoriasis, JIA	infxn, TB, immunosuppres, hep b react, lupus like synd,	optic neuritis	
endocet®	oxycodone w/APAP	analgesic-narcotic: acetaminophen + opioid	combo, see MOA for individual drugs	pain reliever-mod to severe, fever	lung, kidney and liver issues, seizures, sulfite sens, local anesthetics, addison's, ophthalmic beta blockers	jaundice/icterus, blurred vision, mydriasis, pinpoint pupils with overdose	schedule II; preg cat c; taper with dependency
eserine®	physostigmine	muscle- anticholinesterase inhibitor--IM and IV	increases ACH at NMJ	urinary retention, myasthenia gravis, anticholinergic toxicity	DM, AACG, o. cholinergics anticholinergics b block alpha 2 ag sympathomims, local anesthetics	cholinergic crisis, bradycardia, respiratory distress, miosis, blur	
eskalith®	lithium	antipsychotic	sodium transport	bipolar, mania, schizoaffective disorder	ACE inhibs, COX 2, diclofenac, CAIs, diuretics,	mydriasis?, nystagmus, pseudotumor cerebri	

45

TRADE	GENERIC	TYPE/CLASS	ACTION	USE	OC IMP--CI/CAUTION	OC IMP--S/E	MISC
estrace® or premarin®	conjugated estrogens	hormone-estrogen	hormone replacement therapy	menopause, osteopor, hypoestrogen, breast & prostate cancer, hypogonad	azole antifungal, corticosteroids, omega 3,	migraine, visual changes	
evista®	raloxifene	hormone-selective estrogen receptor modulator	stimulates estrogen	breast cancer, osteoporosis		blepharitis, conjunctivitis, dry eye, cls intolerance	
famotidine®	pepcid	antihistamine-histamine 2 receptor antag	reduces HCl secretion	GERD, ulcers	antifungals, antivirals, pain relievers, cyclosporin, lidocaine, valium	icterus (jaundice of sclera)	
famvir®	famciclovir	antiviral-DNA synthesis inhibitor	defective nucleotide incorporated into viral DNA	HSV, HZV CMV			
feldene®	piroxicam	NSAID-nonselective	decrease PG and thromboxanes	inflam, pain, fever, dysmenorrhea, RA, osteoarth, ank spond	preg, anticoag, coags, c steroids, asthma, cardiovasc dz, topical diclofenac, dehydr, HTN, ACE inhibs	bleeds, nephrotoxicity, hepatotoxicity, stevens-johnson, ecchymosis	preg cat c
flagyl®	metronidazole	antimicrobial	destroys bacterial DNA & RNA	rosacea, anaer bact infxns, trichomoniasis, amoebiasis, bact vaginosis, giardiasis, PID	carcinogenic risk, cyclosporin, oral contras, Cron's		
flexeril®	cyclobenzaprine	skeletal muscle relaxant	reduces neuronal impulses	muscle relaxant for muscle spasms	incr IOP, narrow angle glauc, hyperthy, antichcols, o. chol antags	blurred vision, jaundice, dry eye, cls intolerance	
flomax®	tamsulosin	BPH-alpha 1 ag	reduces cxn of prostate and urethra	BPH		collagen fibers leading to floppy iris syndrome, progressive miosis
