

Outreach & Advocacy Report
3-15-2011

We will be trying to do further outreach with the academic institutions, not just those that have library schools, but those that have health sciences programs. We hope to get in touch with the librarians who liaison for the health professions at each university.

In addition, I would ask for the funds to represent MHSLA at the FAME Research Forum. Many librarians at the Flint Hospital Libraries help with the research for the students and residents who present at this forum and we thought it would be nice to have a display.

We are looking forward to promoting MHSLA and advocating for Health Science Librarians throughout Michigan.
