Archivist's Report
January 17, 2012

Currently there are 170 documents scanned into the MHSLA Archives. There are 2 students working at the Ferris State University Archives this semester who can, as time allows, devote time to scanning MHSLA documents.

It had been suggested by a MHSLA member that scanning of photos occur soon to use the organizational knowledge to identify individuals in pictures that are not labeled. The insight of the board is sought regarding whether picture scanning should be made a scanning priority. The current focus has largely been on materials related to the MHSLA Executive Board.

Respectfully submitted,

Alison Konieczny
