Applications Technical Team

Monday, July 16, 2007

3 – 4 pm; WES 206

Meeting Minutes

1. gurjobs Files –

- Users need to save their new file runs to another location from now on
- Programmers can save off historical files if requested (until delete procedure is implemented)
- Rob has a shell script that zips files
- Recommend sending out a **UWN with instructions** for saving to a new location when we are ready to implement the deletion process
- Recommend not saving files to the desktop

2. Change Management –

- Corrections and modifications have been submitted
- Don't need to use this database until corrections have been made

3. Banner and Luminis upgrades –

- Distributed a copy of the components that need to be upgraded

4. Additional IS&T UAP outcomes –

- Wireless project completion
- Upgrade Banner servers – Thursday, Aug 1st; will double capacity of all 4 servers
- Upgrade Operational Data Store server – quotations are in for server and SAN storage
- Parallel environments for MYFSU – in conjunction with above #3 project
- Network Security Strategy
- Upgrade Storage Area Network
- PeopleAdmin Software – to begin in November
- Physical Plant CMMS – currently collecting RFPs from vendors
- QAS – Address verification software
- **Suggestion:** Look at all approved UAPs for Ferris to identify any application needs

5. Update on current projects –

- Remaining migration
 - What about the SISCVT conversion account? Programmers would still like to use this account because of increased permissions it has.
 - Programmers should not have the capability to create procedures in GOLD
 - Programmers should create in SAND and then request permissions for it to be run in GOLD
 - Programmers have a need to create temporary tables to run reports
 - This will need to be discussed some more; **call an ad hoc group.**
 - Using the Ferris schema; how to move scripts from your personal schema to the Ferris schema
- Xtender
 - Need SSL set up
 - Ports need to be lock down now and appropriate rights set up

- Table entries still need to be done
- Migration of documents from DocuShare still needs to be done
- WebFOCUS upgrade – target is Aug 10th
- ODS – unknown
- Millennium upgrade – test system being set up
- Kronos test system – in progress

6. Programmer “share” times – *skipped*

Additional Topic –

- Possibly meet in PRK 104 for future meetings to accommodate our group better.
