STATEMENT OF AIMS

The next few years will be challenging for Michigan Health Science Librarians. At a time when technologies are waiting to be tried the economy will be trying all of us - - academic and hospital medical librarians alike. We also face a period of change in organization at the National level in the Medical Library Association. Now is the time for all good Michigan Health Science Librarians to come to the aid of each other by sharing experiences through the MHS LA Newsletter and expertise through the Annual Education Conference. Our motto should be "Excellence With Economy and Technology in Michigan Health Science Libraries."

I have watched the MHS LA grow from individual good intentions to the formalized organization of today and have participated in many of the decisions that have shaped our group. My experience in the university environment and the hospital setting gives me a broad perspective. As coordinator for Continuing Medical Education activities for Burns Clinic and Northern Michigan Hospitals, I have managed a budget of \$10,000 per year for these meetings as well as attended to the many details that make for a successful educational activity.

I have participated in the accreditation process successfully in the hospital setting, in the medical education setting and in the community college programs and realize their importance in setting and maintaining standards. I hope with the cooperation of other members of MHS LA that I can continue to contribute to the growth and improvement of health information services for the professionals and citizens of Michigan.

STATEMENT OF AIMS

As Michigan's largest group of health science librarians, MHS LA should exert a more active and influential role in pertinent issues within Michigan, the library communities and MLA. Many of the mechanisms (i.e. Legislation Committee, MLA Liaison Committee, Committee on Michigan Library Organizations, etc.) needed to accomplish this task are in place.

To guide these committees and the organization in the next three to five years I would like to see MHS LA develop a long range plan. An established plan will assist the group in 1) setting priorities, 2) deciding major issues and 3) allowing us to focus our efforts on issues selected by the group.
