

MICHIGAN STATEWIDE HEALTH SCIENCES UNION LIST OF SERIALS
(MISHULS)

APRIL 1985

HISTORY OF
MICHIGAN STATEWIDE HEALTH SCIENCES UNION LIST OF SERIALS
(MISHULS)

In 1980 the Michigan Health Science Library Association (MHSLA) Board appointed an Ad Hoc Committee "to present a plan for production of a statewide union list of serials, including budgetary financial requirement and a time frame for production". Chaired by Lynn Sorensen Sutton, the Ad Hoc Committee conducted a survey in November, 1982, to identify those libraries interested in participating in a cooperative union listing project. The majority of hospital libraries in the state indicated willingness to participate.

At the MHSLA Annual meeting in 1982 members approved the concept of using the Online Computer Library Center (OCLC) union listing component. Concurrently, the Michigan Library Consortium with the endorsement of the Library of Michigan, was using LSCA III funds to support an OCLC based multi-type state list of serials.

In their final report to the Board in 1983, the Ad Hoc Committee recommended the establishment of two new standing committees: a Union List of Serials Committee and an Interlibrary Loan Committee. The rationale being any union list of serials requires an advisory group to manage it and make policy recommendations to the participants, and there was precedent in the Michigan Area Serials Holdings (MASH) and the Union List Of Selected Serials of Michigan (ULOSSOM) Committees. Thus the Ad Hoc Committee, having completed its task, was discharged.

After five years of committed effort, MISHULS has become a reality. We are confident the resulting network will be effective in distributing document delivery workloads equitably among participants, and will enhance the dissemination of information to health science professionals in the State of Michigan.

Look for a MISHULS evaluation form in May. We need your feedback prior to our update order in August.

A special thank you to Addie Heilbronn and the Chi Memorial Library staff of Ingham Medical Center for their technical support.
