INTRODUCTION

This catalog lists and describes audiovisual software held by the participating Health Instructional Resources Associated (H.I.R.A.) institutional members. It supercedes all previous H.I.R.A. catalogs.

The first section of the catalog contains audiovisual software listed alphabetically by subject. Subject headings are from the National Library of Medicine's Medical Subject Headings (MeSH). In the second section, the software is listed alphabetically by title with descriptive information and location symbols.

The majority of programs listed have a production date of 1975 or later. Audiovisual series, e.g. NCME and Audio Digest, have not been included in the catalog itself, but are in a separate section in the introductory pages.

All audiovisuals included in the catalog are available for loan, however, individual institutions should be contacted for their specific lending policies. A copy of the Inter-Institutional Loan Agreement is included in this catalog.

INTER-INSTITUTIONAL LOAN AGREEMENT
AMONG MEMBERS OF
HEALTH INSTRUCTIONAL RESOURCES ASSOCIATED
(H.I.R.A.)

This is a voluntary agreement adopted by those members of H.I.R.A. which engage in inter-institutional loan of instructional materials for the purpose of promoting better access to biomedical information for health care personnel. Terms contained herein are negotiable among institutions.

I. DEFINITION:

Inter-institutional loans of instructional materials are transactions in which resources are shared by one institution with another.

II. PURPOSE:

Since it is impossible for any one institution to be self-sufficient, inter-institutional borrowing and lending is regarded by the institutions subscribing to this agreement as essential.

III. RESPONSIBILITIES:

- A. Each institution entering into this agreement shall regard itself as a lender.
- B. Each institution will provide the resources necessary to support the purposes of its parent institution and will not assume that inter-institutional lending relieves it of the responsibility of developing its own collection. No institution should depend upon another to supply the normal needs of its clientele.
- C. Lending institutions will practice as liberal and unrestrictive a policy as possible in loaning of instructional materials with due consideration to the interests of their primary clientele.
- D. Lending institutions will collect and maintain data concerning their inter-institutional lending operations and will submit this data to the committee when required.
- E. Borrowing institutions are expected to check their own holdings before requesting any item on inter-institutional loan.
- F. Borrowing institutions will screen users' requests to determine that they are pertinent to the parent institution's purposes and will reject those requests that are not.
- G. Borrowing institutions should report any damage or other problems about the conditions of borrowed materials to the lending institutions.

IV. TERMS OF LOAN:

A. EXPENSES

1. Borrowing institutions will assume any costs charged according to the established policy of a lending institution. These costs may include postage, insurance and in-service charges.
2. No rental fee shall be levied for loan of instructional materials.

B. LIMITATIONS

1. Borrowing institutions will honor any limitations on use imposed by a lending institution.
2. Copyright compliance is the responsibility of a borrowing institution. Copying or duplicating of instructional materials shall be done only after written permission of the copyright holder is obtained.
3. The safety of borrowed materials is the responsibility of a borrowing institution. A borrowing institution will meet all costs of repair or replacement in accordance with the preferences of a lending institution.
4. The minimum lending period shall be three days. Exceptions may be negotiated.

C. PLACEMENT OF REQUESTS

1. Every effort will be made to locate materials through H.I.R.A. union list prior to request.
2. Requests may be transmitted by mail, messenger or telephone. The standard ALA interlibrary loan request form should always accompany a request. When mutually agreeable, telephone requests are acceptable and shall be confirmed by the submission of the standard form.
3. Whenever possible, materials should be picked up and returned in person.

D. FORM OF REQUEST

1. Material requested must be described as completely and accurately as possible.
2. The name and status (position or other identifying information) or the individual for whom the information is being requested shall appear on the request form.

E. DISPOSITION OF LOAN MATERIAL

1. Materials furnished should be returned to a lending institution by the due date and in the original condition as they were loaned.
2. Materials furnished may be renewed at the discretion of a lending institution.
3. Materials furnished are subject to recall at any time and a borrowing institution shall comply promptly.

F. NOTIFICATION AND ACKNOWLEDGMENT

1. If material cannot be supplied, a lending institution shall indicate promptly the reasons to a borrowing institution (preferably by telephone).
2. Except in the case of very valuable shipments, no acknowledgment of receipt is necessary. If there is undue delay in receipt of shipments, a borrowing institution shall notify a lending institution so that a search may be initiated.
3. If any circumstances prevent prompt return, a borrowing institution is responsible for notifying a lending institution on or before the due date.

V. EVALUATION AND AMENDMENT:

- A. To provide a means of continuous evaluation of the effectiveness of this agreement in promoting good inter-institutional loan service among the H.I.R.A. members and to provide a means of amending the agreement when necessary, the Resource Sharing Committee will meet at the discretion of the chairperson.
- B. The Resource Sharing Committee will facilitate its continuing analysis of the effectiveness of the Agreement by requiring data concerning inter-institutional lending operations from the H.I.R.A. membership annually.
- C. Any proposed additions or changes shall be presented to the H.I.R.A. membership to be approved or disapproved by a minority vote of the membership. The Resource Sharing Committee shall provide the membership a copy of the proposed additions and/or amendments thirty (30) days prior to the next regularly scheduled meeting.

VI. VIOLATION OF THE AGREEMENT:

If the Resource Sharing Committee determines that there is continued disregard of the provisions of this agreement, this shall be sufficient reason for suspension of borrowing privileges.
